

Solid Surface Installation Webbing and Buckle System

When installing sandbox on any solid surface it is important to use our Strap and Buckle System. This system allows sandboxes to be assembled on solid surfaces with out staking panels for support. Using the strap system, panels will be secured to one another and keep them from pushing outward.

Important!

Strap kits are **not** included with sandbox kits. Please contact Sandlock for the strap kit that matches your sandbox. Reference item number listed here.

Call toll free: (866) 963-9422

Important !

When adjusting straps it is **important to adjust them so that the panels are slightly inward.** Once sandbox is filled the out ward pressure form the sand will set the panel to a straight position.

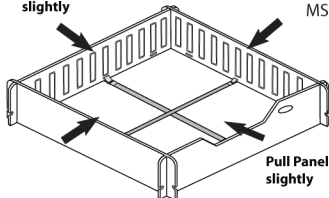

5' x 5' CSG-6060

Strap kit item number (SLA-6060SK)

MSRP: \$10.00

Pull Panels inward slightly

Pull Panels inward slightly

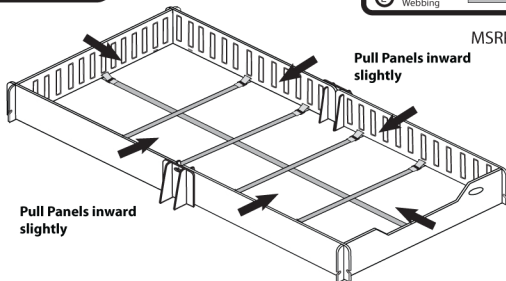

5' x 10' CSG-60120

Strap kit item number (SLA-60120SK)

MSRP: \$18.00

10' x 10' CSG-120120 Strap kit item number (SLA-120120SK)

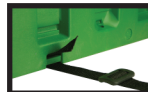

MSRP: \$26.00

Pull Panels inward slightly

Pull Panels inward slightly

With buckle on strap thread strap through anchoring point at bottom of panel

Thread strap back through buckle with enough strap to adjust. Adjust tightness of straps so that panels are pulled slightly in ward

- Panels should be adjusted so they are slightly inward .This will allow panels to be in line when sand is in place.

- Sandbox should be assembled on flattest area of the solid surface.
